NEWS RELEASE

ELECTROCUBE OFFERS BROAD LINE OF SEACOR CAPACITORS

MONROVIA, California...Electrocube, Inc., a leading U.S. manufacturer of precision film capacitors and other passive components acquired the Seacor family of quality capacitor products in May, 2002.

This acquisition has broadened Electrocube's presence in the industry with the addition of general purpose and precision, high voltage polyester, high pulse polypropylene, X2 suppression, motor start/run and standard/high ripple current electrolytic capacitors to their product capabilities. Customers are offered a wide selection of standard designs and features engineered to meet numerous requirements. Capacitors are available with UL, CSA, SEV and VDC approvals.

For over 42 years, Electrocube, Inc. has designed and manufactured AC and DC film capacitors, RC networks, IGBT snubbers, EMI filters, aluminum foil transformers, aircraft lighting ballasts and other custom designed components.

The offering of Seacor's capacitors has enabled Electrocube to expand their product capabilities as a recognized supplier of an extensive range of capacitor products and customer engineering services for the electronic, communication, industrial, military and aviation marketplaces.

For additional information on Electrocube and their Seacor capacitor line, please visit their website at www.electrocube.com or contact: Ms. Gloria Snyder, National Sales Manager, Electrocube, Inc., 1307 S. Myrtle Avenue, Monrovia, California 91016, TEL: (626) 301-0122; FAX: (626) 357-8099; e-mail: gloriasnyder@electrocube.com.
